

VOYOLink is a first of its kind SaaS platform that connects vehicles remotely to service centers with a single click. Vehicle owners and service managers have access to the same diagnostic alerts and vehicle health data. Information is displayed in the VOYOLink portal or posted to service IT applications such as SMS, CRM or legacy ERP systems. Over 36,000 service centers currently listed on VOYOLink in the US and Canada. VOYO fleet and consumer telematics integrate seamlessly with VOYOLink.

VEHICLE OWNERS

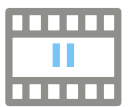

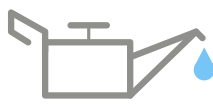

SERVICE CENTERS

DATA
